

### **Gigaset DECT Range**

With the Siemens Gigaset cordless solution you can make the most out of your communication platform. The roaming and handover functionality ensures that calls can be made or received from any location within a DECT server radio network.

### **Gigaset S3**

The Gigaset S3 Professional is an elegant high-tech cordless handset which uses the digital DECT/GAP standard offering excellent audio quality and additional features of;

- DPS (DECT Positioning System) for locating cordless users
- Multi-cell capability
- Full-duplex hands-free talking with best-in-class acoustics
- Extensive phone book functions (incl directory of up to 250 names/numbers and simple administration via PC)
- Illuminated graphical display
- Bluetooth headset jack and PC interface
- Up to 9 hours of talk time and up to 180 hours of standby time

### **Gigaset SL3 Professional**

The Gigaset SL3 professional is a small and light cordless design offering the same features as the S3 but with additional features of;

- HPS (HiPath Positioning System) for locating mobile users
- Voice dialling and vibration alarm
- Illuminated graphical colour display, with illuminated keypad including navigation area
- Up to 10 hours talk time and 200 hours in stand-by mode

### **Gigaset M2 Professional**

Suitable for industrial environments, the Gigaset M2 has built in protection against sprayed and splashed water and a dustproof, shatterproof casing. Features include;

- IP rating IP65 (casing protection)
- Emergency button
- HiPath Positioning System support (HPS)
- Bluetooth™ headset support
- Acoustically optimized for industrial environments
