

Using the Programme – Service Key

The Program/Service Key works in conjunction with the Optiguide menu to allow you access to additional features programmed by your system administrator but not configured as feature keys.

When using the **Optiguide menu**,

- Press the “**Program/Service**” key.
- You may scroll through the entire list of available functions.
- Press the selector key to choose one.

When using a **programmed key**,

- Pressing the “**Program/Service**” key accesses functions within the Optiguide menu.
